Professional Summary

Full Stack Software Engineer and certified CPIC collegiate member specializing in event-driven architectures, scalable enterprise backends (.NET, RabbitMQ, PostgreSQL, Oracle DB), and modern web/mobile interfaces (Angular, React, Ionic). Experienced in Clean Architecture, DDD, CQRS, mission-critical port logistics, and financial protocols (ISO 8583). Actively contributing to open-source software, developer tooling, and dApp integrations across the Stellar / Web3 ecosystem.

Professional Experience

Full Stack Developer JAPDEVA (Port Authority)

Jul 2026 – Present

Port Yard Management System (YMS) | .NET · Angular · RabbitMQ · EF Core · PostgreSQL · Oracle DB · Docker · Ionic

- Leading end-to-end analysis, architecture, and development of the mission-critical Port Yard Management platform for container, vehicle, and bulk cargo logistics across Atlantic terminals.
- Replacing legacy physical paperwork and spreadsheets with an event-driven system built on **Clean Architecture, DDD, and CQRS** via **RabbitMQ**, capturing real-time operational events to automate billing and terminal settlement.
- Designed functional workflows for container restows, space allocation, equipment tracking, and gate dispatch; modeled relational data structures in **PostgreSQL** and **Oracle DB** using **EF Core** with full audit traceability.
- Developing operational tracking interfaces using **Angular** and **Ionic Framework** containerized with **Docker**.

Full Stack Developer CyberPro CR

Jan 2025 – Jun 2026

Routify TMS (AVON Logistics) | Flutter · Vue.js · TypeScript · Express.js · SQLite · AWS S3

- Engineered an **offline-first architecture** with SQLite (Drift) for real-time mobile logistics, automating background synchronization of transactions, deliveries, and returns upon network restoration.
- Integrated REST APIs for route monitoring, digital signature captures, and delivery logs stored on AWS S3.

FACONTPOS & Enterprise Systems | Next.js · TypeScript · Express.js · Prisma · MySQL

- Developed electronic invoicing engines compliant with Costa Rican Tax Administration (Hacienda) rules and multi-branch inventory tracking.
- Built an enterprise OCR document pipeline featuring **RSA-signed JWT** authentication, HttpOnly cookies, and granular RBAC.

Lawai LegalTech Platform | React · TypeScript · Express.js · Prisma · Jest

- Optimized Google Gemini AI pipelines, cutting latency from **17s to 8s** through RAG search parallelization and caching.
- Implemented resilient backend proxies to resolve cross-origin bottlenecks and managed multi-page OCR document queues.

Key Technical Projects

Encrypted Financial Microservices & QR Payments | React · Ionic · .NET 8 · Azure · ISO 8583

- Architected an independent multi-tenant microservices system in **.NET 8** with dedicated API Gateways across 8 core domains.
- Engineered encrypted QR generation, credit card verification (Luhn algorithm), and financial transactions via **ISO 8583 protocol**.

SOLITEL Platform (Judicial Investigation Agency - OIJ) | Angular 18 · .NET 8 · EF Core · SQL Server

- Engineered a **5-layer Clean Architecture** backend for judicial wiretap workflows with multi-tiered approvals and cryptographic audit trails.

Technical Skills

Backend & Architecture: .NET / C#, RabbitMQ, Clean Architecture, DDD, CQRS, Event-Driven Architecture, Node.js, Express.js, REST APIs

Frontend & Mobile: Angular, React, Next.js, Ionic Framework, Flutter, Vue.js, TypeScript, JavaScript, Tailwind CSS

Databases & Cloud: PostgreSQL, Oracle DB, SQL Server, MySQL, SQLite, EF Core, Prisma ORM, Docker, Azure, AWS S3, Git/GitHub

Web3 & FinTech: Stellar Ecosystem, Freightier Wallet, USDC Trustlines, Cryptographic Signatures (RSA), ISO 8583, QR Payments

Professional Credentials: Member of CPIC (Colegio de Profesionales en Informática y Computación de Costa Rica)

Education & Professional Credentials

Colegiado Activo – CPIC

Active Member

Colegio de Profesionales en Informatica y Computacion de Costa Rica

B.S. in Business Informatics (Bachillerato en Informatica Empresarial)

2021 – 2025

Universidad de Costa Rica (UCR)
